

LANL Building Official

Listing of Approved IBC Testing Agencies, Fabricators, and Products June 28, 2017

This listing is published pursuant to the LANL International Building Code (IBC) Program defined by Chapter 16 of the LANL Engineering Standards (click [here](#)), and is posted on that same site. See that program for process and restrictions.

For testing agencies, presence in these listings is necessary for performance of IBC-related work for LANL or its contractors and subcontractors. LBO approval does not negate Subcontractors' responsibility to assure that testing agencies and fabricators perform correctly.

CAUTION FOR NUCLEAR FACILITY WORK: Presence of any firm or product on these listings does not also indicate evaluation or approval for use in nuclear-related work from a nuclear QA standpoint. For that use, items or services must also be either commercial-grade dedicated or supplier listed on LANL's QA Division Institutional Evaluated Suppliers List (IESL), [here](#) (LANL internal website).

This LBO listing includes (in a single listing):

1. Approved testing agencies (lab and field material testing); ref. ESM Chapter 16 Section IBC-TIA.
2. Non-destructive examination (NDE) and/or welding inspection; ref. ESM Chapter 13.
3. Shop fabricators of steel and precast concrete who may self-perform in-shop inspections); see ESM Chapter 16 Section IBC-FAB.

Discussion of LANL Building Official (LBO) approved products and related listing follows the above.

For questions, suggestions, or concerns regarding this listing, please contact:

1. Testing Agencies, Fabricators, and Special Inspection: Kevin Krank, Chief Inspector (505-606-0580, krank@lanl.gov).
2. Welding: David Bingham, Welding Chief Inspector (505-664-0416, dbing@lanl.gov)
3. NDE: Kelly Bingham, 505-667-6167, kellyb@lanl.gov

For administrative (e.g., personnel) updates please notify oruch@lanl.gov

Testing Agency and Fabricator Summary of Approvals

CAUTIONS: Limitations/scope-of-approval and other details on pages that follow
Weld inspection approval is not per these listings but via [this](#) internal LANL website database

New Mexico

| Firm | Concrete (C) | Masonry (M) | Metal ID Testing (ID) | NDE (NDE) | Soil (S) | Geotech Testing (G) | Steel Fab (SF)* | Concrete Prefab (CP) | Comments |
|--|--------------|-------------|-----------------------|-----------|----------|---------------------|-----------------|----------------------|---|
| Amec Foster Wheeler | X | X | | | X | X | | | ABQ office only |
| Concrete, Aggregate, and Asphalt Testing | X | | | | X | | | | Las Vegas, NM |
| Daniel B. Stephens & Associates | | | | | | X | | | ABQ, within scope of AASHTO certifications |
| LANS (LANL) | X | | X | X | X | | X | | Fab at SM-38 only. All inspections by CM-CE. CM-CE/LBO reevaluation required upon next use. |
| NV5 (formerly Allwyn and Kleinfelder) | X | | | | X | X | | | ABQ office, TWF Project Site Testing Facilities only |
| Premier NDT Services | | | | X | | | | | Farmington |
| Terracon | X | | | | X | X | | | ABQ office only |

| Diversified Metal Products | | | | | | | X | | Idaho Falls, ID |
| Great Denver Iron | | | | | | | X | | Denver, CO. CM-CE/LBO reevaluation required upon next use. |
| Hirschfeld Industries | | | | X | | | X | | San Angelo, TX plant; NDE: Ultrasonic, Magnetic Particle, Visual and AWS-CWI; fab approval currently limited to TWF Project. |
| IMR Metallurgical Services, Louisville KY | | | X | | | | | | Full range of mechanical and chemical testing of metals |
| JR Custom Metal Products | | | | | | | X | | Wichita, KS |
| Mistras Services, Denver | | | | X | | | | | Radiography, dye penetrant, ultrasonic, and magnetic particle |
| MMI Tank and Industrial Services, Inc. | | | | | | | X | | Phoenix, AZ |
| NUCOR–Building Systems–Utah, LLC | | | | | | | X | | Brigham City, UT. Steel fab on DEOS Project, with conditions. |
| Premier Steel Fab, Tulsa | | | | | | | X | | CM-CE/LBO reevaluation required upon next use. |
| RedGuard | | | | | | | X | | Wichita, KS |
| Stork Testing and Metallurgical Consulting, Houston | | | | X | | | | | Houston location/staff only: liquid penetrant, magnetic particle, and ultrasonic testing only |

* CAUTION: Structural steel fabricators whose work includes seismic load or seismic-force-resisting structures (SFRS) or demand-critical welds are subject to project-specific IBC reviews and approvals for processes, procedures, qualifications and materials prior to start and may require shop inspections by LANL approved IBC Inspectors prior to, during, or after fabrication.

Typical Accreditations:

- Concrete—ASTM C 1077
- Masonry –ASTM C 1093
- Soils—ASTM D 3740
- Geotech – see heading and table below
- Steel – [AISC](#) Quality Certification Program for Steel Building Structures & Simple Steel Bridges
- Steel, Seismic – AISC 341

Testing Agencies

For testing agencies, approval criteria and the process for becoming listed may be found in ESM Chapter 16 Section IBC-TIA and applicable national and industry standards as listed below.

Evaluations of testing agencies for approval by the LANL Building Official (LBO) generally model the associated national codes/standards identified in the LANL site standards and specifications. These codes, such as ACI 301, ASTM E 329, and other ASTM standards generally require national accreditation for each company, each facility, and mobile units. Evaluations will be done by an LBO-approved chief inspector unless another evaluator is specifically approved by the LBO. The evaluation will focus on verification of national accreditation for the specific type of testing along with verification of key attributes such as, qualified personnel, calibrated devices, proper documentation processes (internally and externally). An example is that the Testing Agency must follow the applicable ASTM or other code(s) used for specific tests including documenting on their reports any cases where they do not follow the specific test methods.

Geotechnical (Subsurface Investigations)

This work (e.g., seismicity, stratigraphy, ground water conditions, slope stability, soil strength, position and adequacy of load-bearing soils, the effect of moisture variation on soil-bearing capacity, compressibility, liquefaction and expansiveness) shall be performed by an LBO-approved geotechnical firm with a history/expertise in subsurface evaluations and performed under the direct supervision of a qualified geotechnical engineer. In addition (based on the specific edition of the IBC imposed on the project), the registered design professional shall have a fully qualified representative on site during all boring and sampling operations. Subsurface firms must meet these minimum requirements whether or not they are also an approved testing agency; furthermore, an LBO-approved soil testing agency must be used for all analytical soil tests governed by lab accreditations (e.g., ASTM D 3740).

| |
|--|
| Field Method List |
| ASTM D2487 Standard Procedure for Classification of Soils for Engineering Purposes |
| ASTM D2488 Practice for Description and Identification of Soils (Visual-Manual Procedure) |
| ASTM G57 Standard Practice for Soil Resistivity Using the Wenner Four-Electrode Method |
| Laboratory Method List |
| ASTM D422 Standard Test Method for Particle-size Analysis of Soils |
| ASTM D1557 Test Method for Laboratory Compaction Characteristics of Soil Using Modified Effort |
| ASTM D2216 Test Methods for Laboratory Determination of Water (Moisture) Content of Soil and Rock by Mass |
| ASTM D3740 Practice for Minimum Requirements for Agencies Engaged in Testing and/or Inspection of Soil and Rock as Used in Engineering Design and Construction |
| ASTM D3080 Test Method for Direct Shear of Test of Soils Under Consolidated Drained Conditions |
| ASTM D4318 Test Methods for Liquid Limit, Plastic Limit, and Plasticity Index of Soils |
| ASTM D4546 Test Methods for One-Dimensional Swell or Collapse of Soils |
| AASHTO T-193 Standard Method of Test for the California Bearing Ratio |

Selected Standards (Current Editions)

- A2LA for NDE laboratory testing
- AASHTO [re:source](#) (formerly AMRL) testing lab accreditation program
- ASNT (American Society for Nondestructive Testing) document SNT-TC-1A on NDE (and ESM Chapter 13 on Welding, Joining, & NDE)
- ASTM E 329, Standard Specification for Agencies Engaged in the Testing and/or Inspection of Materials Used in Construction
- ASTM E 543, Standard Practice for Agencies Performing Nondestructive Testing

- AWS (American Welding Society) QC-4 for welding qualification testing facilities
- ICC-IAS [Accreditation Criteria for Testing Laboratories \(AC89\)](#)
- ICC-IAS [Accreditation Criteria for Fabricator Inspection Programs for Reinforced Concrete \(AC157\)](#)
- ICC-IAS [Accreditation Criteria for Fabricator Inspection Programs for Structural Steel \(AC172\)](#)
- National Ready Mixed Concrete Association (NRMCA)
- Precast Concrete Institute (PCI)
- Additional specific accreditation programs based on IBC or associated national standards such as ACI, [AISC](#), and ASTM

LBO-APPROVED PRODUCTS

General

LBO approval of suppliers and manufactured products for structural and other work is governed by ESM Chapter 16 Section [IBC-GEN](#) (*Section 8.0*).

Also at time of writing, IBC-GEN (Rev. 10, 10/6/2016) said:

- 8.1. Under 104.9, 104.11, and the Special Cases section of the IBC (1705.1.1), proprietary products must be approved by the LBO. Structural examples are anchor channels, mechanical reinforcing steel splices/couplers, and post-installed (PI) anchors.
- A. Such components are automatically approved by the LBO if they are PI anchors used in a seismically exempt application (see definition). For other products, they are also automatically approved if they meet both of the following:
 - 1. The components chosen are IBC-compliant-labeled (has been accepted by the most recent ES report from ICC-ES or ER report from IAPMO valid for the code edition in use or newer edition) AND
 - 2. The design and installation complies with the conditions of use and restrictions specified in the ICC report (in addition to and including following manufacturer instructions, particularly where more stringent). Installation must be verified by special inspector(s) when required by ICC ES Report and/or IBC Ch.17 on special inspection.
 - B. Products accepted by Los Angeles Dept. of Buildings (see footnote) are also acceptable at LANL except where specifically limited by the LANL Standards and Master Specs.¹
 - 1. *LADBS and ICC reports (and others) are aggregated at ApprovalZOOM.com*
 - C. Other special case components not automatically approved as noted above must be submitted to the ES-EPD Structural Team which will broker LBO approval prior to use...

Specific Product Approvals

Products listed in LANL Master Specifications shall be considered LBO-approved for IBC use.

Drillco anchors are no longer listed below because they now have an ESR report.

Disclaimer: Listed products and service providers have received LBO approval within the context discussed by this document. They are not an endorsement of any product or provider beyond that approval, nor guarantee of future work/sales. Finally, they do not imply that other products or providers will necessarily be unacceptable if submitted for approval; that depends upon subsequent LBO evaluation.

¹ LADBS Information Bulletin (IB) P/BC-2011-119 — *Alternate Building Materials/Products Approval Requirements* [LADBS IB website](#)
