

LANL Building Official

Listing of LBO-Approved IBC Work Testing, NDE, and Inspection Agencies; Fabricators; and Products July 28, 2021

For agencies, presence in these listings is necessary for performance of IBC-related work for LANL or its contractors and subcontractors. LBO approval does not negate Subcontractors' responsibility to assure that testing agencies and fabricators perform correctly.

This listing is published pursuant to the LANL International Building Code (IBC) Program defined by Chapter 16 of the LANL Engineering Standards (click [here](#)), and is posted on that same site. See that program for process and restrictions.

CAUTION FOR NUCLEAR FACILITY WORK: Presence of any firm or product on these listings does not also indicate evaluation or approval for use in nuclear-related work from a nuclear QA standpoint. For that use, items or services must also be either commercial-grade dedicated or supplier listed on LANL's QA Division Institutional Evaluated Suppliers List (IESL), [here](#) (LANL internal).

This document includes (in a single list):

1. Approved testing agencies (lab and field material testing); ref. ESM Chapter 16 Section IBC-TIA.
2. Non-destructive examination (NDE) and/or welding inspection (ESM Chapter 13 welding program's database control individual inspector quals separately).
3. General and Special inspection agencies; ref. IBC Section 110 and Ch 17, and ESM Chapter 16 Section IBC-TIA.
4. Shop fabricators of steel, aluminum, and precast concrete who may self-perform in-shop inspections); see ESM Chapter 16 Section IBC-FAB.

Discussion of LANL Building Official (LBO) approved products and related listing follows the above.

For questions, suggestions, or concerns regarding this listing, please contact (all Area Code 505):

1. Test and/or Inspection Agencies, Fabricators: Timothy Donovan, Chief Inspector (500-2731, timd@lanl.gov).
2. Welding: David Bingham, Welding Chief Inspector (664-0416, dbing@lanl.gov)
3. NDE: David Harvey, 695-3667, dpharvey@lanl.gov; Kelly Bingham, 667-6167, kellyb@lanl.gov; or David Bingham.

To submit updates please notify oruch@lanl.gov

Agency and Fabricator Summary of Approvals

CAUTION: See Limitations, scope-of-approval, and other details on pages that follow

Weld inspector approval is not per these listings but via ESM Ch 13 [6-01](#) and [this](#) internal LANL website database

New Mexico

Firm	Concrete Testing (C)	Masonry (M)	Metal ID Testing (ID)	NDE (NDE)	Soil (S)	Geotech Testing (G)	Steel Fab (SF) Note 2	Concrete Prefab (CP)	Third-Party Inspection (Note 3)	Comments
Bauman Industrial Labs				X						ABQ office; VT, PT, MT, UT
Clover Leaf Solutions						X			X	ABQ office
Concrete, Aggregate, and Asphalt Testing	X				X					Las Vegas, NM
Coreslab Structures								X		ABQ facility only; not concrete testing
Daniel B. Stephens & Associates						X				ABQ, within scope of AASHTO certifications
LANL (e.g., Triad, LLC)	X		X	X	X		X			Fab at SM-38 only; all inspections (General and Special) by ES.
NorthGES	X	X		X	X	X			X	ABQ office; weld VT
NV5 (formerly Allwyn and Kleinfelder)	X	X			X	X			X	ABQ office
Premier NDT Services				1						Farmington
Terracon	X				X	X				ABQ office only
Western Technology	X				X	X			X	ABQ office only
Wood	X	X			X	X			X	ABQ office only
Yearout Industrial							X			ABQ

Note 1: A "1" for a firm indicates re-evaluation required prior to use.

Note 2: Structural steel fabricators whose work includes seismic load or seismic-force-resisting structures (SFRS) or demand-critical welds are subject to project-specific IBC reviews and approvals for processes, procedures, qualifications and materials prior to start and may require shop inspections by LANL approved IBC Inspectors prior to, during, or after fabrication

Note 3: General (110) and Special inspections except as noted; LANL must approve proposed inspectors.

CAUTION: See Limitations, scope-of-approval, and other details on pages that follow

Out-of-State

Firm	Concrete (C)	Masonry (M)	Metal ID Testing (ID)	NDE (NDE)	Soil (S)	Geotech Testing (G)	Steel Fab (SF) Note 2	Concrete Prefab (CP)	Third-Party Inspection (Note 3)	Comments
BlueScope Buildings NA							X			Visalia, CA location only
Bridge Brothers										Anderson, SC; aluminum pedestrian structures only
CTL-Thompson Testing Agency, Denver	X									Only durability testing per ASTM C 666, prisms in water tank.
Diversified Metal Products							X			Idaho Falls, ID
Global Fire Protection Group									X	Chads Ford, PA (esp. firestopping)
Great Denver Iron							X			Denver, CO. LBO reevaluation required before next use.
Hirschfeld Industries				1						San Angelo, TX plant; NDE: Ultrasonic, Magnetic Particle, Visual and AWS-CWI.
IMR Metallurgical Services, Louisville KY			X							Full range of mechanical and chemical testing of metals
Independence Steel and Rigging							X			Pima, AZ
IRISNDT				X						Tulsa, OK
JR Custom Metal Products							X			Wichita, KS
Mistras Denver				1						Radiography, dye penetrant, ultrasonic, and magnetic particle
MMI Tank and Industrial Services, Inc.							X			Phoenix, AZ
NUCOR–Building Systems–Utah, LLC							X			Brigham City, UT. Steel fab on DEOS Project, with conditions. Other work requires evaluation.
Premier Steel Fab (Tulsa, OK area)							X			Excludes demand critical; additional review/approval required for seismic force-load-resisting
RedGuard							X			Wichita, KS
Rigid Global Buildings							X			Houston, TX
Stork Testing and Metallurgical Consulting				1						Houston location/staff only: liquid penetrant, magnetic particle, and ultrasonic testing only

Table Notes

Note 1: A "1" for a firm indicates re-evaluation required prior to use.

Note 2: Structural steel fabricators whose work includes seismic load or seismic-force-resisting structures (SFRS) or demand-critical welds are subject to project-specific IBC reviews and approvals for processes, procedures, qualifications and materials prior to start and may require shop inspections by LANL approved IBC Inspectors prior to, during, or after fabrication

Note 3: General (110) and Special inspections except as noted; LANL must approve proposed inspectors.

Background

Typical Accreditations:

- Concrete—ASTM C 1077
- Masonry –ASTM C 1093
- Soils—ASTM D 3740
- Geotech – see heading and table below
- Steel – [AISC](#) Quality Certification Program for Steel Building Structures & Simple Steel Bridges
- Steel, Seismic – AISC 341

Testing Agencies

For testing agencies, approval criteria and the process for becoming listed may be found in ESM Chapter 16 Section IBC-TIA and applicable national and industry standards as listed below.

Evaluations of testing agencies for approval by the LANL Building Official (LBO) generally model the associated national codes/standards identified in the LANL site standards and specifications. These codes, such as ACI 301, ASTM E 329, and other ASTM standards generally require national accreditation for each company, each facility, and mobile units. Evaluations will be done by an LBO-approved chief inspector unless another evaluator is specifically approved by the LBO. The evaluation will focus on verification of national accreditation for the specific type of testing along with verification of key attributes such as, qualified personnel, calibrated devices, proper documentation processes (internally and externally). An example is that the Testing Agency must follow the applicable ASTM or other code(s) used for specific tests including documenting on their reports any cases where they do not follow the specific test methods.

Geotechnical (Subsurface Investigations)

This work (e.g., seismicity, stratigraphy, ground water conditions, slope stability, soil strength, position and adequacy of load-bearing soils, the effect of moisture variation on soil-bearing capacity, compressibility, liquefaction and expansiveness) shall be performed by an LBO-approved geotechnical firm with a history/expertise in subsurface evaluations and performed under the direct supervision of a qualified geotechnical engineer. In addition (based on the specific edition of the IBC imposed on the project), the registered design professional shall have a fully qualified representative on site during all boring and sampling operations. Subsurface firms must meet these minimum requirements whether or not they are also an approved testing agency; furthermore, an LBO-approved soil testing agency must be used for all analytical soil tests governed by lab accreditations (e.g., ASTM D 3740).

Field Method List
ASTM D2487 Standard Procedure for Classification of Soils for Engineering Purposes
ASTM D2488 Practice for Description and Identification of Soils (Visual-Manual Procedure)
ASTM G57 Standard Practice for Soil Resistivity Using the Wenner Four-Electrode Method
Laboratory Method List
ASTM D422 Standard Test Method for Particle-size Analysis of Soils
ASTM D1557 Test Method for Laboratory Compaction Characteristics of Soil Using Modified Effort
ASTM D2216 Test Methods for Laboratory Determination of Water (Moisture) Content of Soil and Rock by

Mass
ASTM D3740 Practice for Minimum Requirements for Agencies Engaged in Testing and/or Inspection of Soil and Rock as Used in Engineering Design and Construction
ASTM D3080 Test Method for Direct Shear of Test of Soils Under Consolidated Drained Conditions
ASTM D4318 Test Methods for Liquid Limit, Plastic Limit, and Plasticity Index of Soils
ASTM D4546 Test Methods for One-Dimensional Swell or Collapse of Soils
AASHTO T-193 Standard Method of Test for the California Bearing Ratio

Selected Standards (Current Editions)

- A2LA for NDE laboratory testing
- AASHTO [re:source](#) (formerly AMRL) testing lab accreditation program
- ASNT (American Society for Nondestructive Testing) document SNT-TC-1A on NDE (and ESM Chapter 13 on Welding, Joining, & NDE)
- ASTM E 329, Standard Specification for Agencies Engaged in the Testing and/or Inspection of Materials Used in Construction
- ASTM E 543, Standard Practice for Agencies Performing Nondestructive Testing
- AWS (American Welding Society) QC-4 for welding qualification testing facilities
- ICC-IAS [Accreditation Criteria for Testing Laboratories \(AC89\)](#)
- ICC-IAS [Accreditation Criteria for Fabricator Inspection Programs for Reinforced Concrete \(AC157\)](#)
- ICC-IAS [Accreditation Criteria for Fabricator Inspection Programs for Structural Steel \(AC172\)](#)
- National Ready Mixed Concrete Association (NRMCA)
- Precast Concrete Institute (PCI)
- Additional specific accreditation programs based on IBC or associated national standards such as ACI, [AISC](#), and ASTM

Yearout Industrial, LLC.

8501 WASHINGTON ST NE
ALBUQUERQUE, NM 87113

505-884-0994 fax 505-883-5073

Approved to perform: Steel fabrication. Seismic force/load resisting work requires re-evaluation/ approval.

Contact: Bryan Yearout, President, c: 505-991-5062, bryan@yearout.com

Audit history: KB 12/2015; LBO 12/16/15 (ES-DO-16-002). No AISC 6/2017 TO.

LBO-APPROVED PRODUCTS

General

LBO approval of suppliers and manufactured products for structural and other work is governed by ESM Chapter 16 Section [IBC-GEN](#) (*Section 8.0*).

Also at time of writing, IBC-GEN (Rev. 11, 11/29/2018) said:

- 8.1. Under 104.9, 104.11, and the Special Cases section of the IBC (1705.1.1), proprietary products must be approved by the LBO. Structural examples are anchor channels, mechanical reinforcing steel splices/couplers, and post-installed (PI) anchors. As such, from an IBC standpoint only:
- A. Such components are automatically approved by the LBO if they are PI anchors used in a seismically exempt application (see definition). For other products, they are also automatically approved if they meet both of the following:
 - 1. The components chosen are IBC-compliant-labeled (has been accepted by the most recent ES report from ICC-ES or ER report from IAPMO valid for the code edition in use or newer edition¹) AND
 - 2. The design and installation complies with the conditions of use and restrictions specified in the ICC report (in addition to and including following manufacturer instructions, particularly where more stringent). Installation must be verified by special inspector(s) when required by ICC ES Report and/or IBC Ch.17 on special inspection.
 - B. Products accepted by Los Angeles Dept. of Buildings (see footnote) are also acceptable at LANL except where specifically limited by the LANL Standards including Master Specs, when used in non-nuclear service and with any applicable conditions placed by LADBS.²
 - 1. LADBS are at <http://netinfo.ladbs.org/rreports.nsf>
 - C. Other special case components not automatically approved as noted above must be submitted to the ES-EPD Structural Team which will broker LBO approval prior to use. *Guidance: This may involve derating; e.g., using less tension and/or shear capacity than documented for a concrete anchor /embedding, using a mechanical rebar splice /coupler capacity that results in the final assembly 'performing' only within elastic region, etc.*

Specific Product Approvals

Products listed in LANL Master Specifications shall be considered LBO-approved for use.

Disclaimer: Listed products and service providers have received LBO approval within the context discussed by this document. They are not an endorsement of any product or provider beyond that approval, nor guarantee of future work/sales. Finally, they do not imply that other products or providers will necessarily be unacceptable if submitted for approval; that depends upon subsequent LBO evaluation.

¹ When a given product's research report isn't compliant with the applicable IBC edition, contact ESM POC for guidance
