

Site + Architectural Design Principles

Produced under the Direction
of the Senior Executive Team
and
Site Planning and Construction
Committee
by the
Site Planning and Development
Group, PM-1

LA-UR 01-5383

F O R W A R D

As Los Alamos National Laboratory enters the 21st Century, it steps forward with a progressive plan to evolve its physical infrastructure to meet new global challenges. Within the next ten years, revitalization of the core of the Laboratory and creation of several consolidation plans will be in place or in the process. Part of the success of this enormous undertaking is to ensure the highest quality and effectiveness of the investments made. The use and application of the Site and Architectural Design Principles to all development is a critical component of achieving that success.

ACKNOWLEDGEMENTS

Site Planning and Construction Committee

Jim Holt, Associate Director Operations
 Dave Post, PM Division Director
 Tony Stanford, FWO Division Director
 Christopher Webster, Strategic Research
 Dennis Martinez, DOE-LAAO

Associate Director Operations & Project Management Division

Carolyn Zerkle, Director, Office of Infrastructure, Facilities and Construction
